

# Phoenix Flange Kits

## Description:

Phoenix flange kits contain all the components required for flange sealing. Each kit incorporates a gasket and a set of bolts, nuts and washer and can be customised to suit almost any flange size.

Phoenix flange kits are supplied in bags that are labelled with the flange class and size, the gasket grade, the number, size and grade of the bolts and the quantity of nuts and washers. We can produce the kits with customer labels, including company logo, if required.

## Application:

Phoenix flange kits are used to provide a one stop resource for flange assembly. Our kits can be designed to suit all flange standards and with almost any combination of gasket type and bolt grade.

## Availability:

Flange Standard: ASME, DIN, JIS

Gasket: Compressed Fibre, EPDM, Nitrile, Graphite, Filled PTFE, Spiral Wound Gasket

Bolting: 8.8, B7, B16
